Click the 'use the template' button on screen to automatically save you a copy of the template that you can edit.

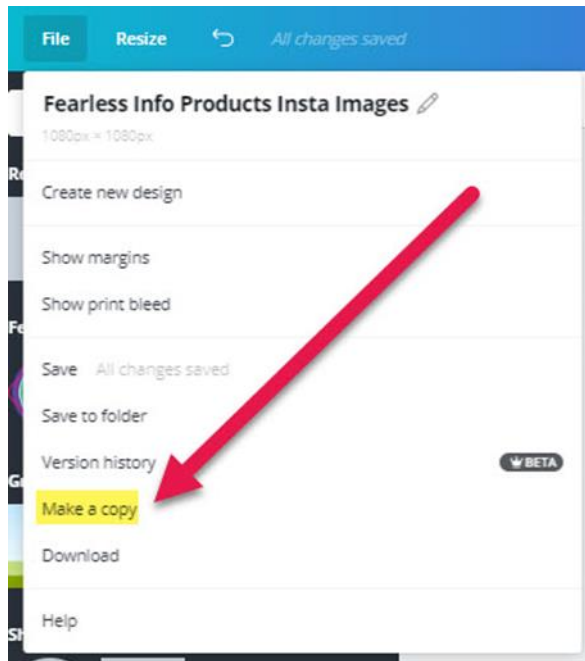

If you don't see this option, here are the instructions to make your own copy:

Go to the top left of your screen and then click File.

Then click "make a copy"

This opens a brand-new tab with the images all neatly ordered ready for you to brand and download.

Close the original tab, and make edits to your own copy of the template.

## Ready to add another course to your offers?

### Don't have time to create it yourself?

Head over to the [Content Sparks Shop](#) to leverage our done-for-you course content, so you can quickly set up and attract students to your online course and don't have to start from scratch ever again.
